DETAILED ACTION

1. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

This application is claiming the benefit of a prior filed nonprovisional application under 35 U.S.C. 120, 121, or 365(c). Copendency between the current application and the prior application is required. This application was filed more than three years after the prior application was patented (and ceased to be "pending"); therefore there is no "copendency". See 35 USC 120 below (emphasis added):

35 U.S.C. 120 Benefit of earlier filing date in the United States.

An application for patent for an invention disclosed in the manner provided by the first paragraph of section 112 of this title in an application previously filed in the United States, or as provided by section 363 of this title, which is filed by an inventor or inventors named in the previously filed application shall have the same effect, as to such invention, as though filed on the date of the prior application, **if filed before the patenting or abandonment of or termination of proceedings on the first application** or on an application similarly entitled to the benefit of the filing date of the first application and if it contains or is amended to contain a specific reference to the earlier filed application. No application shall be entitled to the benefit of an earlier filed application under this section unless an amendment containing the specific reference to the earlier filed application is submitted at such time during the pendency of the application as required by the Director. The Director may consider the failure to submit such an amendment within that time period as a waiver of any benefit under this section. The Director may establish procedures, including the payment of a surcharge, to accept an unintentionally delayed submission of an amendment under this section.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 29-60 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hince, et al. (U.S. Patent number 6,020,185).

It is noted that applicant has filed this application as a "Divisional" of the application which became U.S. Patent number 6,020,185. Since this application was filed after the issue date of that patent, this application is not entitled to divisional status under 35 USC 120 and 121. Furthermore, since this application was filed more than 1 year after the issue date of that patent, applicant is not entitled to a patent for this application under 35 USC 102(b).
